

TAKE A TOUR

"The foundation of Arowana was laid on the principles of delivering quality service which adds relevant value to your process, products and brands."

From products that help airlines manage and fly their staff better to offering services to stock markets on mobile platforms, Arowana is a company which excels in the world of new-generation IT solutions.

Established 2006, Arowana has grown and expanded it's profile in the IT market, creating products & solutions for present and future needs. With an aim of global reach and local presence we have extended our clientele across Middle East, India, USA and Africa.

Quality and control are of the greatest importance to any customer, being a company appraised at CMMI Level 3 we assess every new project in a defined manner and deliver them with precision.

We maintain a business standard while delivering our solutions to your business needs. Building on more than 10 years of experience in various domains and centers of excellence, we have delivered various products and services with proven success. We are now placing ourselves firmly in global markets and moving ahead to bring about, "World Class" products.

"We stand out; spot us easily"

**SPOT US ON
THE GLOBE**

Arowana Consulting is headquartered in the IT city of India Bangalore, with fully fledged offshore development units. We have branched out and expanded our company units to geographies such as Dubai, Abu Dhabi, Jeddah and Riyadh with a fully owned subsidiary in New Jersey USA. .

CHISELING
EXCELLENCE

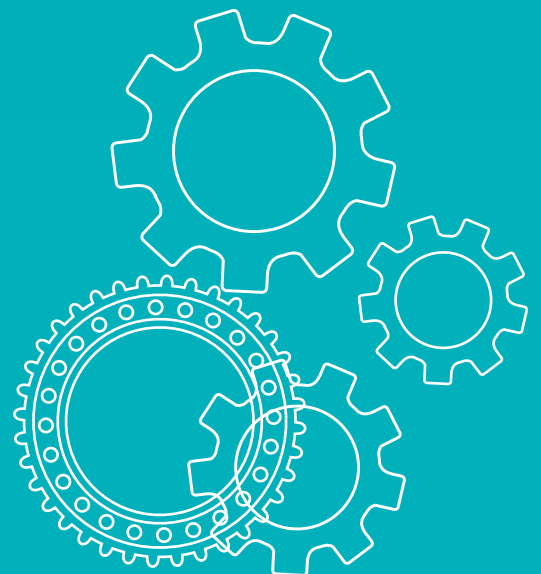

"Give us a rock, our technologists will chisel it with their tools and produce an excellent end product"

Arowana has teams of highly experienced professionals, who develop a deep understanding of your business needs; we access appropriate technologies and customise our solutions to meet specific client requirements.

Our Centers of Excellence foster best practices and implement a continuous improvement process for a practice, keeping in mind the changing dynamics and improvements happening in the practice space. Focussing on Oracle solutions such as, consulting, implementing, training, roll outs, upgrades, provide business analytics using Hyperion practice and planning. Our current focus is on providing services and applications through secure cloud computing platforms. We also continue to invest heavily on delivering meaningful Business Intelligence through Big Data Analysis. Using internationally approved methods and products we test your solution to meet quality requirements.

We provide training to our project handlers so that they use a hands on approach while handling projects and tasks. Our CMMI Compliant development and management helps you in engineering your solution with assured quality using the best applications to develop our products and services. Our existing range of products and solutions are built to work across multiple platforms and data bases. With the growth in technology and use of products and services developed for integrated platforms, we provide products that can be used on all current, popular mobile platforms.

As a customer, quality is an important factor to you. Our client- focused understanding helps us to use innovative approaches while developing products under our areas of excellence.

CHOOSE
FROM
THE RACK

"Our Products are designed in a manner which can be altered to suit your needs. We understand your best practices, how to achieve it and ensure that what we produce are products with excellence"

ENGAGE
 IN THE
 MODELS

"Models are designed to either save you time or money or enhance your brand's reputation. Our expertise ensures access to the latest technologies, thus giving you a return on investment."

We share your perceptions and understanding of quality in your business operations and processes. Our development of your products can help you fulfill all your expectations. Quality Assurance is tailored to your need at every stage from concept, to evaluation to distribution to help you meet industry standards & governance requirements where applicable.

Mutually we determine and specify the skill and development period, at an agreed rate our resources will work for you either off shore or on site. Arowana will provide a full cycle of testing, implementation, assist in global roll out and deliver a full set of documentation at a fixed price in a fixed period of time.

We will analyze your requirement, translating it into a working solution. As we cannot allocate full time resources to work on a project we provide a hybrid model of time and material used along with fixed price and time as required.

"Come talk to us, we can establish a relationship that is ethical secure and sustainable."
